If you're not already a customer of Betenbender Manufacturing, Inc. we welcome you as a future owner of an American made Betenbender Hydraulic Shear, Hydraulic Press Brake or C Frame Press. If you've purchased one before, we welcome you back. We are pleased that our customers come back again and again, as they grow and need more equipment.

Our full range of Hydraulic machines are engineered for simplicity and ease of operation. We have a national and international sales and service team ready to serve you.

Since 1972 we have continually updated our designs and equipment to meet our customers' needs. We always appreciate and welcome feedback from our customers.

Max Betenbender

ABOUT US

1971

2014

Our History

The Betenbender Family of American Hydraulic Shears and Hydraulic Press Brakes is made by Betenbender Manufacturing, Inc. in Coggon, Iowa, U.S.A. Now in our fifth decade in business, our Midwestern Company continues to produce what we believe is America's best built Shears and Press Brakes.

Glen (Pete) Betenbender began as a blacksmith in Coggon during the 1930s. During WWII, he ran a small fabrication and repair shop. In 1948 he and his wife, Blanche, moved their growing business into their current location as a repair and manufacturing facility. Their son, Max, joined the company in 1967 after serving in the United States Army. In 1972, Pete and Max built their first shear for their own use, but demand from other local businesses for their shear prompted the Betenbenders to begin producing shears for national and international resale. In 1984 Betenbender Manufacturing, Inc. got its first contract to produce shears for a major company.

In 2012, Betenbender Manufacturing, Inc. purchased Hydraulic Machines, Inc. from long time friends, Alan and Whitney Hanner. Under the HMI (Hydraulic Machines of Iowa) name we offer a line of C frame presses ranging from 35 ton to 200 ton.

Betenbender Manufacturing, Inc. continues to be a family owned business. Today Max is President and his wife, Donna, is the corporations Secretary-Treasurer. The Vice President, Kyle Rawson, handles the operation of the manufacturing facility which includes customer service and fabrication.

Today there are over 3,900 Betenbender machines in use with very few on the used market.

We have always said...

This Betenbender Shear, one of our first machines-built in 1972, is still in operation!

High Profile Shear - 2004

“If it says Betenbender on the nameplate, you’ve got a machine that will do the job.”
